Annex I:
Project Description

I. Project Objective

The objective of the Project is to help increase the resilience of communities in the Recipient’s territory to the impacts of climate variability and change and natural hazards on food and water security as well as livelihoods.

II. Project Description

The Project consists of the following parts:

Component 1: Institutional Strengthening for Climate Change Adaptation and Disaster Risk Management

Supporting the Recipient to operationalize Project management functions by:

1.1 Strengthening the PMU by building capacity in Project management, procurement, financial management and monitoring and evaluation through (i) the effective implementation of the Project and of the Japan Policy and Human Resources Development (PHRD) Grant, (ii) training for new or additional staff upon their assignment to the PMU, and (iii) the development of Operational Manuals to guide overall PMU operation, Subproject selection, formulation, and implementation.

Details for Sub-component 1.1:

a) This sub-component builds on the planned integration of functions of the National Advisory Committee on Climate Change (NACCC), and the National Task Force for Disaster Risk Reduction and Disaster Management (NTF), into a new agency to be known as the National Advisory Board for Disaster Risk Reduction and Climate Change (NAB). The planned Secretariat/Project Management Unit (PMU) to the NAB, which will be attached to the Vanuatu Meteorological and Geohazards Department (VMGD), will have critical functions in regard to helping to translate the policies of the NAB into actionable projects/programs, while also providing management oversight and guidance to the participating agencies that will be responsible for such project/program implementation.

b) To the extent the initial four Secretariat/PMU staff (civil servants hired by government) will be primarily focused on providing policy and planning support to the NAB, the Project will provide complementary support to both initiate and build PMU capacity in project/program management, procurement, financial management and Monitoring & Evaluation (M&E). Accordingly, the Project will provide the following contracted specialists: Project Adviser, Climate Adaptation Adviser, Disaster Management Planning Adviser, Procurement, FM Specialist/Accountant and M&E specialists. Contracted staff will be hired for an initial period of three years, in the expectation that additional staff positions in the PMU would be filled through regular appointments. Expected outcomes will be (i) effective implementation of Components 2, 3 and 4 of the Project and of the PHRD supported project, (ii) training for new/additional staff upon their assignment to the PMU, and (iii) the development of the Operational Manual to guide subproject selection, formulation, and

1 The Recipient shall monitor and evaluate the progress of the Project and prepare Project reports on the basis of the indicators acceptable to the World Bank and set forth in the Operational Manual.
implementation, as well as to clarify the procedures for procurement, financial management and M&E for Climate Change and Disaster Management projects/programs.

1.2 Strengthening the NDMO by (i) reviewing the Recipient’s National Disaster Management Act; (ii) developing a strategic plan and organizational structure; (iii) developing the capacity of newly recruited staff; (iv) facilitating learning and twinning with the national disaster management offices of the Solomon Islands and other Pacific Islands countries; (v) establishing fully equipped provincial disaster coordination centers and provincial disaster risk management and climate change adaptation plans in the provinces of Tafea and Torba; and (vi) developing volcano contingency plans for Tanna, Gaua and other high risk volcanic islands.

Details for Sub-component 1.2:

a) This sub-component builds on and supports the restructuring of the National Disaster Management Office (NDMO). As part of implementing the Vanuatu National Action Plan for Disaster Risk Management the NDMO broadened its focus from a primarily disaster response coordination role with staff seconded from the police force to a more comprehensive approach encompassing all aspects of Disaster Risk Management (DRM) and civilian staff. The Project will support the development of a strategic plan and review relevant legislation through broad consultation and provision of short term technical assistance (TA) and will provide essential training for the existing, relatively inexperienced national staff as well as new recruits for the provinces. Further learning will be provided through a twinning and knowledge exchange arrangement with the NDMO of the Solomon Islands and other Pacific Islands.

b) As transport to the outer islands is a major challenge in dealing with disasters, this sub-component will support the decentralization of NDMO functions through establishing fully equipped decentralized Provincial Disaster Coordination and Emergency Operation Centres (PDC) in the Southern and Northern provinces of Tafea and Torba. These will act as a pilot for the other provinces in Vanuatu. The Project will support the construction of two multi-purpose buildings one each in the administrative centres of Tafea and Torba provinces, which are modelled according to recently constructed provincial emergency operation centres in the Solomon Islands. The PDCs will be equipped with essential emergency communication equipment, such as High Frequency (HF) radios and satellite phones. The activities at community level are described in more detail under sub-component 2.2.

1.3 Strengthening the Recipient’s Early Warning Systems by (i) establishing real-time data communication network linking the existing volcano, seismic and weather observing stations with the national data and warning center; and (ii) strengthening multi-hazard standard operating procedures.

Details for Sub-component 1.3:

a) This sub-component assists VMGD in liaison with the NDMO through the provision of a short-term international TA to develop hazard-specific Standard Operating Procedures, which will guide warning and national/provincial disaster centre operations as well as daily monitoring, data analysis and management activities.

b) The Project will establish the missing near real-time communication link for hazard monitoring building on recent advances in (i) high bandwidth connectivity linking national
agencies with provinces under the iGovernment program, and (ii) upgrading and expanding the hazard monitoring station network. In summary the Project will establish communication links between remote data recording stations/local observers and government towers in seven outer island locations. The Project will fund the required equipment, including spare parts, installation costs and a communication/monitoring network engineer, who will oversee the implementation of the station and communication network over a period of three years.

**Component 2: Increasing Community Resilience on Active Volcanic Islands and in Coastal Areas**

Increasing the ability of stakeholders at national, regional and community levels to work together to enhance disaster and climate resilience in rural communities by:

2.1 **Developing Strengthened Methods, Processes and Protocols for Climate Change Adaptation and Disaster Risk Management** to increase the ability of stakeholders of all levels.

Details for Sub-component 2.1:

This sub-component will standardize and improve processes, methods and protocols in order to enable the agencies involved in adaptation and disaster risk management in Vanuatu to better share capacity, experience and knowledge and therefore facilitate Community Based Adaptation (CBA) and Disaster Risk Management (DRM) in a more strategic and consistent manner. Outputs will include the following: (i) guidelines for a standardized (yet flexible) vulnerability and adaptation assessment methodology for Vanuatu that can be adapted as needed for different sectoral, community and organizational contexts, (ii) best-practice guidelines for combining scientific hazard mapping with participatory social assessment and indigenous knowledge, (iii) standardized climate change and disaster messages, manuals, methods and information, education and communication materials, (iv) a manual or manuals containing standard good-practice protocols and procedures for facilitating CBA/Community Based Disaster Risk Management (CBDRM) in Vanuatu, covering aspects such as: site identification; engagement of community governance structures; role of provincial government; roles of line ministries, NGOs and Community-based Organizations (CBOs); duration of support; provisions for sustainability, (v) guidelines and recommendations for appropriate small grants mechanisms for CBA/CBDRM implementation, implementation by government and non-governmental agencies alike, and other source of CBA/CBDRM financing particularly in isolated communities, and (vi) output and outcomes orientated monitoring and evaluation frameworks for tracking progress of CBA/CBDRM projects and programs in Vanuatu, linking to existing frameworks for adaptation or development more broadly.

2.2 **Enhancing Integrated Community and Ecosystem-based Adaptation and Disaster Risk Management in Coastal Areas and on Active Volcanic Islands** by implementing said methods and plans of Component 2.1 through Small Grants to Communities for the financing of pilot community based activities (Subprojects) designed to reduce vulnerability to climate and weather-related risks, as well as geo-hazards.

Details for Sub-component 2.2:

a) Utilizing the outputs of sub-component 2.1, this sub-component will pilot disaster risk management and community-based adaptation activities in coastal and volcanic areas.
Specific focus will be on activities designed to reduce vulnerability to climate and weather-related risks, and geo-hazards. The Project will provide community grants to help address priority risks identified in these plans. The broad methodology for development of Integrated DRM and Adaptation Plans will be streamlined, employing benchmarks and good-practice established under sub-component 2.1. Details of the approach can be found in the Operational Manual.

b) The outcomes of sub-component 2.2 include: (i) community-owned Integrated DRM and Adaptation Plans for up to 6 sites (in up to 4 coastal sites and in 2 volcanic sites, across 3 provinces), developed and implemented, legitimized through both customary and government authorities, (ii) CBO strengthening and development in up to 6 sites, (iii) increased local skills and capacity for community-driven DRM, adaptation, development, natural resource management in up to 6 sites (for example, strengthening planning skills, improved communication between provincial government and communities, and increasing capacity for collective action and dispute resolution), (iv) vulnerabilities reduced through implementation of Project resourced community grants, as well as implementation of strategies using community’s own resources in up to 6 sites, and (v) lessons provided and experience gained to improve the outputs of sub-component 2.1.

c) Eligibility criteria for Project financed grants will be developed under sub-component 2.1. The types of activities that could be financed include: (i) conservation areas to protect coral reef defences, (ii) conservation areas to protect fauna and flora, (iii) introducing climate-resilient crop varieties and techniques (as per Component 3), (iv) food preservation and storage, such as solar dryers, (v) improved reef/fisheries management to sustain fish supply, monitor for ciguatera outbreaks, (vi) improved livestock techniques, such as feed fermentation or animal husbandry, (vii) increased rainwater harvesting and storage (as per Component 4), (viii) flood or erosion control, including planting of vegetation, construction of small-scale retaining walls, rehabilitation of coastal marshes, (ix) multi-functional shelters for the temporary evacuation from disaster threats, and (x) small-scale aquaculture ponds or cages.

Component 3: Promotion of Improved Technologies for Food Crop Production and Resilience to Climate Change

Supporting the Project Implementing Entity and the Recipient to develop approaches, strategies and technologies for adapting to climate change and responding to food security and market demands by:

3.1 Producing and Distributing Improved Plant Genetic Material to: (i) further enrich plant gene pool of root and tuber crops (excluding genetically modified crops) under ongoing international collaborative agreements, (ii) enhance the ongoing process of selection and multiplication of superior lines of root and tuber crops providing protection against biological agents, nutrient disorders, and soil erosion which are effects of climate change, and (iii) expand field testing and multiplication of improved cultivars for distribution to farmers, in collaboration with DARD.

Details for Sub-component 3.1:

a) This sub-component builds upon the experience under a Germplasm Distribution Pilot Project undertaken by the Vanuatu Agricultural and Technology Center (VARTC) with Agricultural Research for Developing Countries (CIRAD). Under that project, large
collections of local and overseas lines of root and tuber crops were established to widen the genetic base of the planting material, thereby enhancing adaptation possibilities to changing climate conditions and biological pressures, for example, from pests and diseases. Cultivars have subsequently been screened and small stocks of improved genetic material have been maintained at VARTC. Under the earlier CIRAD assisted project, improved cultivars of sweet potatoes, taro, yams, and cassava were distributed to some 10 villages (>450 households) across Vanuatu, with positive results in terms of increased production and acceptance in terms of taste. At the same time, a number of valuable lessons were learnt in regard to how the logistics of plant material multiplication and distribution could be better handled, to ensure plant material is not wasted. The approach is similar to that is used to successfully combat the taro leaf blight in Samoa and is backed by the regional germplasm conservation Centre for Pacific Crops and Trees in Fiji. It would also build upon a more recent collaborative initiative between VARTC, the Department of Agriculture and Rural Development (DARD), VMGD and German Aid (GIZ), to develop approaches for helping farmers have access to, and improved knowledge of, strategies and technologies for adapting to climate change, while also responding to food security requirements and market demands.

3.2 Distributing Improved Plant Material and Agricultural Technologies to Support On-Farm Production and Resilience to Climate Change through: (i) the distribution of improved plant material to farmers in at least five key food crop areas, (ii) the implementation of farmer training and technology delivery systems in at least three key food crop areas, and (iii) the adoption of improved cultivars and technologies by farmers that enhance farm incomes, food security and/or improved resilience to the effects of weather extremes and other impacts of climate change.

Details for Sub-component 3.2:

a) While a solid base of improved cropping technologies have been developed and/or adapted for Vanuatu conditions, including improved genetic material, severe capacity constraints in the extension service have limited the dissemination and uptake of these technologies. The absence of support service delivery to farmers is also preventing the dissemination of knowledge on the increased risks associated with weather variability, salinity etc., due to the impacts of climate change, and on mechanisms available to farmers to mitigate such risks through changes in cropping practices. That said, the capacity constraints in the DARD, especially extension, are likely to persist, requiring an approach that depends heavily on collaborators (NGOs) and service providers for farmer training, field nurseries, demonstration plots etc.

b) Under the Project, planting material received from VARTC will be multiplied at sites such as rural training centers, churches, high schools and other suitable locations, under contracts/collaborative arrangements to be managed by the DARD. Planting material from these sites would be distributed to key farmers who would attend training sessions in village locations. DARD will also establish on-farm demonstration sites and follow up cultivar performance. Distribution of superior cultivars would be part of participatory extension, through key farmers (a proven technique), that focuses on farming systems for food security. Since smallholder support services in Vanuatu have been run down over many years, it is expected that the ongoing arrangement of public-private partnerships would continue under the Project. The Project will finance costs associated with establishing plant distribution centers, equipment and small vehicles (such as boats, engines and motor cycles), technical assistance and training, and operating costs. The Project will support a phased and consultative approach to develop mechanisms for technology transfer to farmers.

Supporting the Recipient to increase access to secure water supply by (i) completing the national inventory of rural water systems, updating rural water supply standards and guidelines for rural water supply provision, and improving outreach to partners working in the sector; and (ii) installing rainwater catchment and storage systems to supply safe water to rural communities.

Details for Component 4:

a) Under the Project it is expected that updated “Standards and Guidelines” include both technical and procedural guidelines covering all aspects of rural water provision, with a special focus on small-scale community-level solutions such as rainwater harvesting and storage. Specific advice on how to estimate water quantity needs given projected reductions in rainfall would be provided, together with guidance on operation and maintenance (O&M). Complementing this, the Project will provide for outreach materials on ways to engage communities in all aspects of rural water systems, including site selection, formation and function of Community Water Committees, setting an appropriate fee structure, operations and maintenance, and where to obtain replacement parts and technical assistance.

b) The second phase will involve installing 270 to 300 rainwater catchment and storage systems to supply safe water to approximately 6,000 people in 120 rural communities. This will be done through: (i) development of criteria for selecting communities to be assisted under the project, (ii) review of existing inventory and development of long-list of priority communities, (iii) consultation with partners and provincial authorities to identify specific communities to assist, (iv) provision of training on water governance and operation and maintenance of water systems to participating communities, (v) procurement and shipping of materials to community sites, and (vi) monitoring and evaluation of installation, operation and maintenance, and end-user satisfaction with installed systems.

III. Communication and Visibility

Specific visibility activities for this Trust Fund include: (i) all activities financed under the Project will clearly indicate the receipt of funding from the European Union; and (ii) all programs, products and events financed under the Project will carry the European Union and other donors’ logos.

Specific communication activities for this Trust Fund include: (i) inviting representatives of the European Union to the signature ceremony of the Grant Agreement between the Bank and the Recipient; (ii) developing a communication plan; and (iii) briefing the progress of the Project to the European Union on a regular basis.

If the Administration Agreement is not terminated, the World Bank Group entity shall endeavour to minimise the duration of the suspension and may resume implementation of the Project once the conditions allow, and shall inform the Commission accordingly.

Section 11.02. Upon removal of the suspension, the implementation period of the Administration Agreement shall be automatically extended by an amount of time equivalent to the duration of the suspension. This is without prejudice to any amendments to the Administration Agreement which may be necessary to adapt the Project to the new implementing conditions.

Section 12.01. If, at any time, either party believes that the purposes of the Administration Agreement can no longer be effectively or appropriately carried out, it shall consult the other party. The Administration Agreement may be terminated at the initiative of either party by giving the other party three (3) months' prior written notice to cancel all or part of the Commission's pro rata share of any remaining balance of the Contribution funds that is not committed pursuant to any agreements entered into between the World Bank Group entity and any consultants and/or other third parties for the purposes of the Administration Agreement prior to the receipt of such notice, including the Grant Agreement[s].

The World Bank Group entity shall return such cancelled balance to the Commission including any investment income in accordance with Article 18.

In that event the Commission may request full or partial repayment of any amounts that should have not been considered eligible, after allowing the World Bank Group entity to submit its observations.

Section 12.03. Prior to or instead of terminating the Administration Agreement as provided for in Section 12.02, the Commission may suspend payments or (exceptionally) the eligibility of expenses as a precautionary measure, informing the World Bank Group entity immediately.

Section 12.04 This Administration Agreement shall be automatically terminated if no payment has been made by the Commission within three (3) years of its signature.

ARTICLE 13

Dispute resolution

Section 13.01. The Parties shall endeavour to settle amicably any dispute or complaint relating to the interpretation, application or fulfilment of the Administration Agreement, including its existence, validity or termination. Section 14.04. In order to assist in the defrayment of the costs of administration and other expenses incurred by the World Bank Group entity in administering the trust funds provided to it hereunder, a fixed percentage of Direct Costs, not exceeding 7%, may be deducted from each Contribution and retained as Indirect Costs by the World Bank Group entity. The 7% includes any set up fee that the World Bank governing bodies' decision may establish. Indirect Costs are eligible provided that they do not include Direct Costs specifically charged including preparation and supervision costs.

Where the administrative costs charged by the World Bank Group exceed 7%, the World Bank Group entity may recover the balance as Direct Costs, subject to meeting the requirements governing direct eligible costs referred to in Section 14.01. Indirect Costs shall not be eligible where the Administration Agreement concerns the financing of a Project where the World Bank Group entity is already receiving funding for its functioning from the European Union during the same period in question.

An advance payment, representing 100% of the total Contribution referred to in Section 3.02 of the Administration Agreement shall be payable by the Commission within forty-five (45) days following receipt of the Administration Agreement signed by both Parties and receipt by the Commission of a payment request conforming to the model agreed between the Parties.

The deadline for approving the narrative report and financial information shall be suspended pending the receipt of the requested information.

If the Commission deems that a payment request cannot be met, it shall revert to the World Bank Group entity with a request specifying the additional information it requires within the forty-five (45)-day payment period. The payment period shall be suspended pending the payment request being made available in accordance with Section 15.01.

Approval of a report does not imply recognition of the regularity, authenticity, completeness and correctness of the declarations and information contained therein.

Section 15.03. All payments shall be made in Euro, into such bank account designated by the World Bank Group entity in its request for payment pursuant to Section 9.02.

In case of Multi-Donor Trust Funds, in the event that holding currency of the Multi-Donor Trust Fund is not Euro, the World Bank...
Group entity, shall convert the funds into the holding currency of the trust fund promptly following receipt of the funds, provided that all the necessary documentation has been received, at the exchange rate applicable to the World Bank Group on the date of the conversion unless the parties agree otherwise in Section 7.02 of the Administration Agreement. In all cases, where the Contribution proves to be insufficient to complete the Project as a result of an exchange rate fluctuation, the Commission will not bear any responsibility for additional financing.

Section 15.05. The funds deposited pursuant to Section 15.04 above may be commingled with other trust fund assets administered by any World Bank Group entity, provided they may still be identified as such in the records of the World Bank Group entity but shall be kept separate and apart from the funds of each of the World Bank Group entities.

Section 15.06. The World Bank Group entity may exchange any funds held hereunder for other currencies in order to facilitate their administration and disbursement at the exchange rate applicable to the World Bank Group on the date of the conversion unless the parties agree otherwise in Section 7.02 of the Administration Agreement.

Section 15.07. IBRD shall, on behalf of the World Bank Group entity, invest and reinvest the funds provided by the European Union hereunder pending their disbursement, in accordance with IBRD’s policies and procedures for the investment of trust funds. For Multi Donor Trust Funds and/or Joint Management, IBRD shall credit all income earned on funds received from the Commission from such investment to the trust fund established under this Administration Agreement to be used for the same purposes as the Contribution funds. For Contributions which are not Multi-Donor Trust Funds and/or Joint Management, investment income earned on funds received from the Commission shall be identified as such, and IBRD shall credit such income to the Commission’s Donor Balance Account to be reimbursed to the Commission annually upon receipt by IBRD of banking details and authorized instructions from the Commission. Such refund request shall be sent to the attention of the Division Manager, Trust Fund Division, Accounting Department of the World Bank.

ARTICLE 16

Financial audits and checks

Section 16.01. The World Bank Group shall maintain separate records and ledger accounts in respect of the Contributions deposited by the Commission in the trust fund account and disbursements made therefrom. Separate records and ledger accounts shall be kept for each trust fund.

Section 16.02. The World Bank Group shall provide to the Commission, within six (6) months following the end of each World Bank Group fiscal year, the annual single audit, comprising (1) a management assertion together with an attestation from the World Bank Group’s external auditors concerning the adequacy of internal control over cash-based financial reporting for trust funds as a whole; and (2) a combined financial statement for all cash-based trust funds together with the external auditor’s opinion thereon. The cost of the single audit shall be borne by the World Bank Group.

Section 16.03. For Exceptionally large trust funds where a financial statement audit is deemed appropriate and necessary, the World Bank will include provisions in the Administration Agreement for the financial statements of the trust fund to be audited (either annually, periodically, or at the completion of the trust fund as agreed with the donor(s)), by the World Bank’s external auditors in addition to the Single Audit Report. The costs with respect to such
audits will be paid by the trust fund. These audited financial statements will be submitted to the Commission.

**Section 16.04.** If the Commission wishes to request, on an exceptional basis, a financial statement audit by the Bank’s external auditors of a trust fund established under an Administration Agreement, the Commission and the Bank will first consult one another as to whether such an external audit is necessary. Following consultation, if the Commission wishes to proceed with the external audit, the Bank will arrange for such an audit. The cost of any such audit, including the Bank's internal costs related to such an audit, will be paid by the Commission.

**Section 16.05.** The Bank will provide the Commission with copies of all financial statements and auditors' reports received by the Bank from the Recipients pursuant to the Grant Agreements.

**Section 16.06.** The World Bank Group entity shall, until at least seven years after the End Disbursement Date of the Administration Agreement:

(i) keep financial and accounting documents concerning the activities financed by the European Union hereunder; and

(ii) make available to the competent bodies of the European Union upon request, all relevant financial information, including statements of accounts concerning the project or activity financed by the European Union hereunder (whether executed by such World Bank Group entity or by its subcontractor).

**Section 16.07.** In conformity with the European Union financial regulations, the European Union may undertake, including on-the-spot, checks related to the Projects and activities financed by the trust fund.

**Section 16.08.** The foregoing shall be applied in accordance with the verification provisions provided for in Attachment 3 of the Framework Agreement.

**ARTICLE 17**

**Final amount of the Contribution by the Commission**

**Section 17.01.** The total amount to be paid by the Commission to the World Bank Group entity may not exceed the maximum Contribution established by Section 3.02 of the Administration Agreement, even if the overall actual expenditure exceeds the estimated total budget set out in Section 3.01 of the Administration Agreement unless amended in accordance with Section 9.01.

**Section 17.02** The World Bank Group entity accepts that the Contribution amount shall be limited to the amount required to balance income and expenditure for the Project and that it may not in any circumstances result in a surplus for the World Bank Group entity.

**Section 17.03.** In cases where the Project is not completed by the End Disbursement Date specified in Section 2.03 of the Administration Agreement, the funds that remain unexpended after all Commitments incurred have been satisfied, including investment income will be reimbursed to the relevant Balance Account.

**Section 17.04.** Where the Project is not carried out according to the Administration Agreement and without prejudice to its right to terminate the Administration Agreement pursuant to Section 12.02, the Commission may, after allowing the World Bank Group entity to submit its observations and without prejudice to Article 13, adjust its Contribution pro rata
to the actual implementation of the Project on the terms laid down in the Administration Agreement giving three (3) months' prior written notice.

**ARTICLE 18**

**Recovery**

**Section 18.01.** Upon the completion or termination of the Project for which the European Union has provided funding hereunder, the World Bank Group entity, will refund to the Commission within forty-five (45) days of receiving a written request from the latter any amounts paid in excess of the final amount due for such project (including any investment income not previously reimbursed to the Commission or to the Balance Account).

Such refund request with banking details and authorized instruction from the Commission shall be sent to the attention of the Division Manager, Trust Fund Division, Accounting Department of the World Bank. Any refund to the Commission will be done in Euro, unless the Parties agree otherwise, at the exchange rate applicable to the World Bank Group on the date of the conversion unless the Parties agree to another exchange rate in Section 7.02 of the Administration Agreement. In the event the funds are received by the Commission before such refund request is sent, the Commission will issue a refund request acknowledging their receipt.

**Section 18.02.** If the World Bank Group entity fails to repay by the due date, the sum due shall bear interest in accordance with the rules of the Commission. In case of Contributions which are Multi-Donor Trust Funds and/or Joint Management the accrued investment income may be taken into account.

**Section 18.03.** Amounts to be repaid to the Commission may be offset against amounts of any kind due to the World Bank Group entity or the Recipient, after consulting it accordingly. This shall not affect the Parties' option to agree on payment in instalments.

**Section 18.04.** Bank charges incurred by the repayment of amounts due to the Commission shall be borne entirely by the World Bank Group entity.
